

A winning combination

Robot Compact 80 and Bridgeport XR 760

EROWA Robot Compact 80 on BRIDGEPORT XR 760

Workpiece holding by EROWA

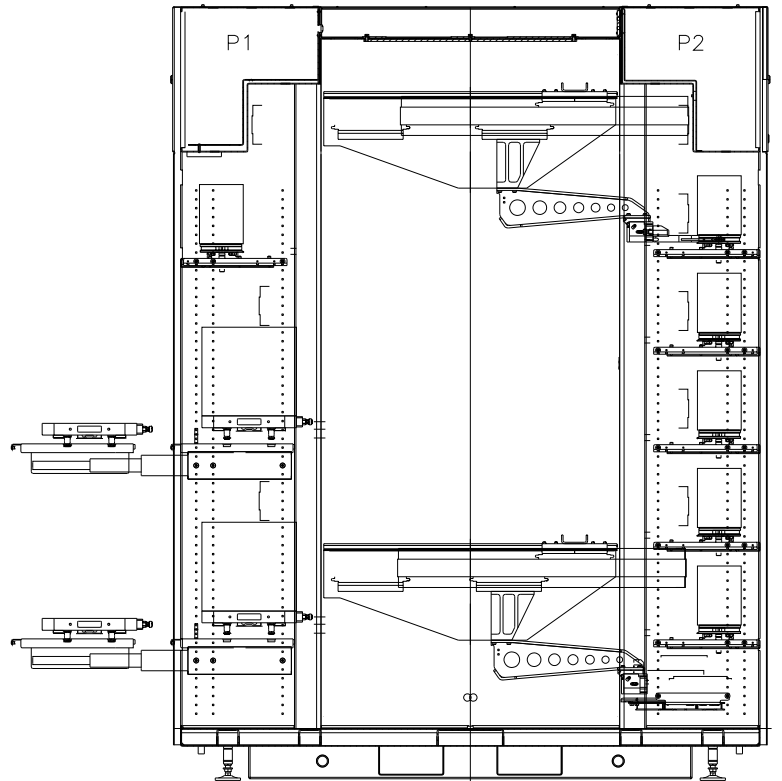

TECHNICAL DETAILS

Transfer weight	80 kg
Swivel arm	Yes
Gripper change	Yes
Two-machine operation	Yes
TRANSFER AXIS	
X-axis travel	1,380 mm
Z-axis travel	1,680 mm
Swivel range	350°
System size LxWxH mm	2,014x1,069x2,612

FACTS

EROWA Robot Compact 80
requires only 2 m² footprint

EROWA Robot Compact 80

Integrated loading station (optional). For setup of large and heavy workpieces at the ergonomically correct height while the robot is working. This is efficient use of time.

EROWA robots open up previously untapped production hours. In the third shift and on weekends production runs autonomously. This requires exact, but still flexible, planning.

The JMS® 4.0 ProductionLine gives you a clear overview. The order list, priorities, the CNC programs, tool management and the current status messages show you what is going on at a glance.

30 Years of Experience

Long experience – short start-up.
EROWA robots consist of sophisticated, standardized components. This allows short set-up times.

Your critical benefits

- Everything from one single source
- Independent partner
- Perfect service with worldwide presence
- Experience with over 4000 robots
- Standardized interfaces
- Long-life systems
- Integrated security system

The Facts

- Only 2 m² for over 200 magazine positions
- Supplies one or two machines
- Flexible magazine configuration
- Mono-block design
- Over 300 pallet positions with additional magazine

Extension options

- Automatic gripper change depending on pallet size
- Automatic pallet identification via chip
- Sliding unit for machine access
- Sliding doors for magazines
- Airdock for direct air supply to table chucks
